

TOBACCO USE AMONG YOUTH BY HEALTH STATISTICS REGIONS 2017

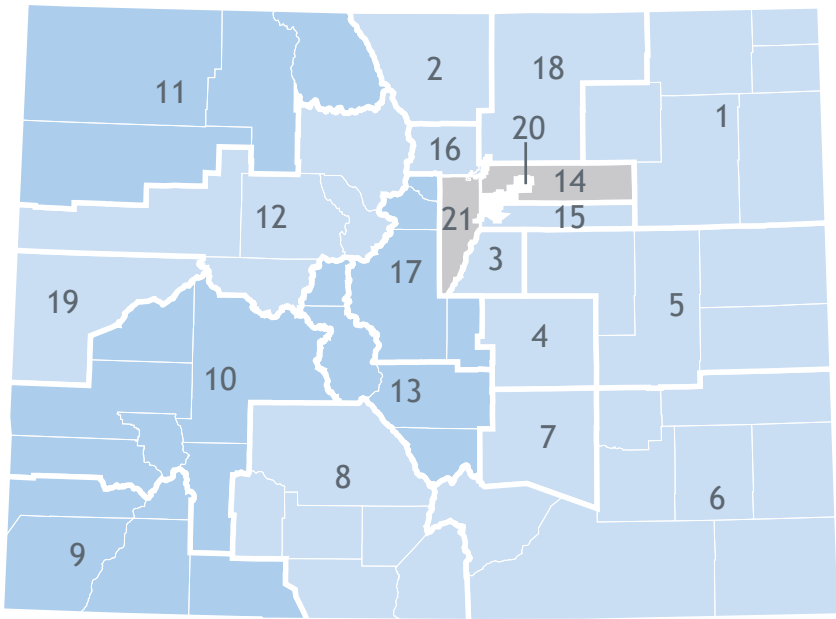

The Healthy Kids Colorado Survey is the state’s only comprehensive survey on the health and well-being of young people. In 2017, the survey sampled approximately 56,000 youth from 190 randomly selected middle and high schools statewide. The voluntary, biennial survey collects a wide range of health and behavioral information that helps public, private and community organizations better understand the youth they serve and support them in making healthy choices. Smoking and vaping prevalence among high school students varies by region. The maps below show the proportion of youth by region who reported smoking or using electronic cigarettes at least once in the past 30 days.

CURRENT USE BY REGION

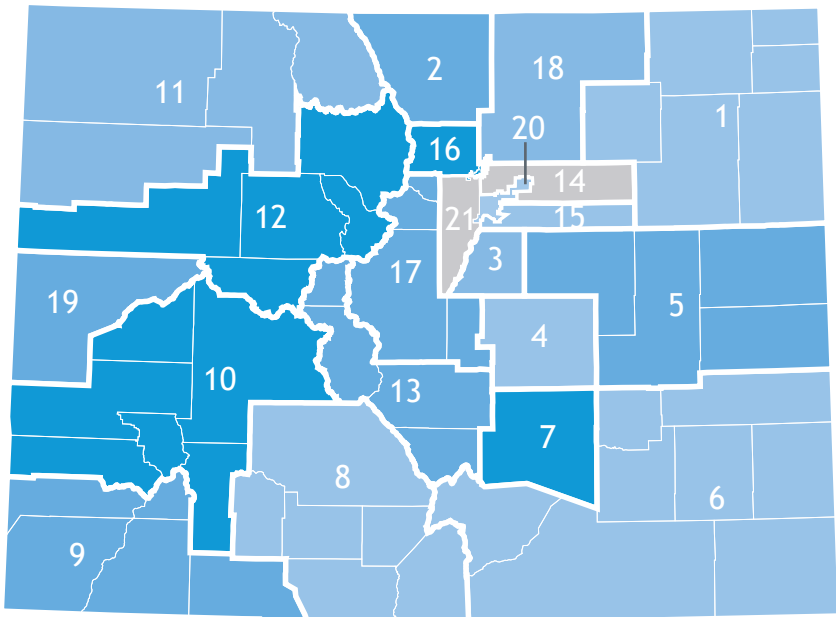

COLORADO AVERAGES
 Current cigarette use: **7%**
 Current e-cigarette use: **27%**
